SEIZURE WATCH - Weekly Smuggling Routes

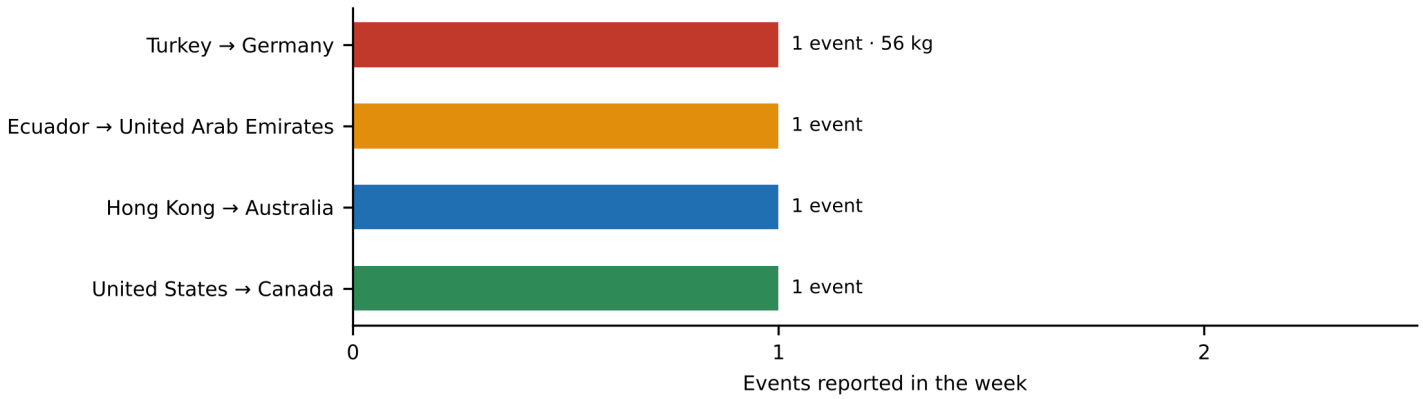

Reporting week: Mon 5 Oct 2026 to Sun 11 Oct 2026

- Of 1,898 events reported, only 4 named both an origin and a destination, so route patterns this week rest on very few reports (previous week: 26 such events, 23 routes).
- Routes as reported: Turkey → Germany (cannabis, 56 kg); Ecuador → United Arab Emirates (cocaine); Hong Kong → Australia (cigarettes); United States → Canada (firearms). Each appeared once, so no single corridor dominates.
- Compared with the week before, none of these four corridors appeared in the week before. The prior week's repeated corridors (Ghana → Belgium, Ghana → Netherlands, Ecuador → Netherlands: 2 events each) did not reappear.
- Wider context: 44 further events name an origin only (most often Lebanon 5, Brazil 5, United States 4). Most frequent drug types overall: Cannabis 556, Cocaine 355, NSA 227.

Origin → destination map (routes drawn straight from origin to destination; width = number of events)

Top corridors by number of events

Coverage: 1,898 events in the week; 4 with a usable route (origin and destination known); 44 origin only; 9 destination only; 1841 with neither. 100% of events are unverified. 'Drug type' is the category assigned by Seizure Watch and includes non-drug goods (e.g. firearms, cigarettes).
Source: open-source news, automatically collected and risk-scored by Seizure Watch. Routes are as reported and unverified reports should be confirmed before operational use.
